Introduction

Two Superior Studios are based at the Plymouth Science Park and work within the digital creative sector providing web platform development, specialising in secure and user friendly systems.

We are a fast growing web development company who are currently working with SMEs, large globally recognised companies, and local authorities across many industries such as retail, recruitment, public sector, pharmaceutical, electronic, and entertainment.

We specialise in bespoke web development, and are looking to build on our product portfolio.

Job Title and Summary

Web Developer and Digital Product Designer - to primarily build, manage and maintain an exciting new project and provide support to new clients.

Key Responsibilities

- Developing the core product, user interface, and developer API;
- Manage client accounts for the new product;
- Aid integration and setup of accounts;
- Designing aspects of the site and user process;
- Promoting the new product on social media and at trade shows

Core Skills

Basic PHP5, and MySQL knowledge is essential along with the ability to code using HTML5, CSS, and jQuery. The successful candidate will need good communication and inter-personal skills as will be working closely with clients.

Additional Skills

Any experience in OO MVC frameworks, particularly Laravel is preferred, and any experience in Git Versions Control, Unix OS such as Ubuntu, Composer, REST and API integrations will also support the application.

Qualifications

A degree in a relevant subject such as Software Engineering, Computer Science or Computer Graphics is not essential, but will help your application. The candidate will need GCSE's in English and Maths (preferably B or above) and A levels or NVQ in a computing related subject.

Salary / Benefits

Full-time position (will also consider part-time candidates) with a basic rate of £10-16k per annum. The successful candidate will be eligible for earning ongoing commission for new product sales along with monthly bonuses. There will often be chances to attend networking events, web developer conferences, and to help promote the product at trade shows. We are prepared to be flexible on working hours providing deadlines are met on time, after completion of the probationary period. The position will be based at our office at Plymouth Science Park, with opportunities to work from home.

Career Path

There will be many chances to advance your career as the business expands, with the successful candidate showing continued motivation and drive to take on further responsibility and management roles.

Recruitment Process

The interview will be a 30 minute informal meeting, where we will have a few questions and the candidate will have chance to see the office and ask their own questions. We also ask that candidates give a short informal presentation of their portfolio or projects which they think are relevant to the role.
